

UNION PLANES

WITH THE NEW

Patent Locking Lever Adjustment

SOLID FROG

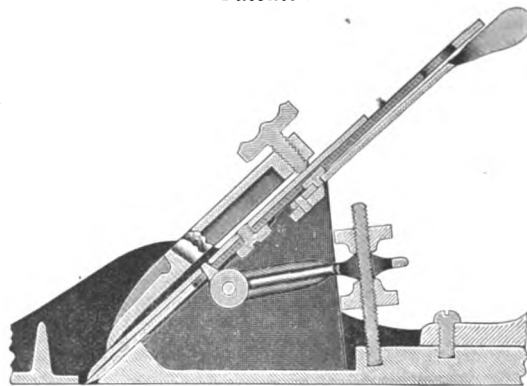

NO LOST MOTION

Used on both Iron and Wood Planes

Patented

A NEW IDEA.

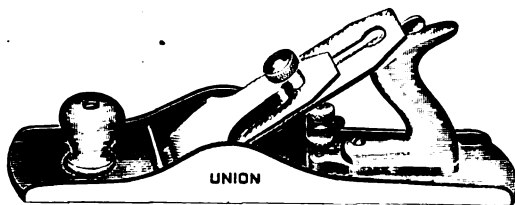

The Cutter instantly responds to the slightest movement of the Lever. The Cutter Seat is solid and cannot become loose.

SECTIONAL VIEW

The Double Nuts lock the adjusting lever securely in any desired position, and can be instantly changed to raise or lower the cutter.

Patented

UNION NO. X5.
